Primble™ | ACORD Underwriting-Readiness Handoff

Commercial insurance review only • For Brent and the India team • Six sample ACORD applications

Purpose. Identify what needs to be provided or confirmed so an underwriter receives a clear, accurate commercial-lines submission. The attached forms contain fictional examples; they are not a completed application for an actual insured. This handoff is limited to insurance information and form completion.

Forms reviewed: 125 (2025/03), 126 (2025/03), 127 (2015/12), 130 (2026/08), 131 (2017/11) and 140 (2016/03).

How to read the highlights on the sample forms

GREEN	Fields populated with fictional examples. The values still need confirmation.
YELLOW	Underwriting questions marked Y/N. A response is needed if the question applies; a Yes may require details.
BLUE	Information that is conditional, not yet known, or requires carrier/insured confirmation.
RED	Something to correct or confirm, or a signature/date area. An unsigned area does not automatically mean an initial quote is incomplete.

ACORD 125 | Commercial insurance application

Complete and confirm

- **Agency and applicant.** Producer contact, legal named insured, entity type, FEIN, contact information, mailing address and requested effective dates.
- **Business and locations.** Actual operations, years/date in business, annual sales, employee counts, all operating/risk locations, building numbers and ownership or tenancy.
- **Coverage requested.** Each line being quoted, including WC if part of the package; confirm that requested lines match the accompanying applications.
- **Prior insurance and losses.** Prior carriers/policy numbers, terms and expiring premiums when available; all reportable losses during the form's requested history period, including dates, description, paid, reserved and open/closed status.
- **General questions.** Obtain explicit responses to every applicable Y/N question and supporting explanations for Yes responses.

Do not require for an initial quote merely because the boxes exist: a carrier-assigned policy number, an underwriter name, or the new quoted premium. Prior/expiring premiums, if known, are different from the carrier's future quote.

ACORD 126 | Commercial general liability

Complete and confirm

- **Requested GL coverage.** Occurrence or claims-made basis, applicable limits, coverage options and deductibles or self-insured retention when requested.
- **Schedule of hazards.** For every applicable exposure: LOC #, HAZ #, classification description and verified class code, proper rating basis and corresponding sales, payroll, area, costs or other relevant exposure.
- **Operations.** Full description of electrical contracting work and where it is performed, including height, underground activity, special hazards and outside work.
- **Subcontractors.** Type of subcontracted work, estimated cost or proportion, certificate and insurance requirements, contractual risk transfer, and whether sub limits are adequate.
- **Products/completed operations.** Relevant products and completed work, sales/exposures, and applicable Y/N questions with explanations.
- **Other underwriting questions.** Answer applicable contractor and general-information questions. Claims-made retroactive/tail questions are conditional on that coverage basis.

Market-specific consideration: a contractors supplemental application may be required; attach it when the underwriter asks or the risk triggers it.

ACORD 127 | Business auto

Complete and confirm

- **Drivers.** List all applicable operators and employees who drive on business, with name, date of birth, licensing state/number, experience and driver/vehicle assignments as requested.
- **Vehicles.** Each vehicle's year, make, model, VIN, garaging address, gross vehicle weight, use, radius, ownership, cost/value and physical-damage coverage/deductibles if requested.
- **Auto insurance requested.** Attach the applicable state ACORD 137 for coverage symbols, limits and elections. Confirm liability, hired/non-owned auto and any physical damage requests.
- **Driver and fleet questions.** Obtain applicable Y/N answers covering vehicle ownership, hiring, MVRs, violations, maintenance, hired/rented use, telematics, inspections, vehicles omitted from schedules and other material hazards.
- **Additional interests and claims.** Include lienholders/loss payees where relevant and provide auto loss history or loss runs as required.

Important: do not leave the telematics question unanswered when monitoring details are supplied. Do not describe a formal recruiting method while recording No without confirming the intended response.

ACORD 130 | Workers compensation

Complete and confirm

- **Insured and locations.** Applicant legal name, FEIN, mailing and working locations, operations, contact information, entity type, years in business and requested policy period.
- **States and limits.** All states with employee exposures, applicable other-states requests, requested Employers Liability limits and any special coverage requirements.
- **Payroll by class.** For each state/location/class: verified workers compensation class code and duties, number of full/part-time employees and estimated annual payroll. Reconcile totals; do not count owner wages twice.
- **Ownership.** Officers/members/owners, duties, percentage ownership, remuneration and included/excluded treatment supported by applicable state rules.
- **Prior carrier and losses.** Form's five-year history: carrier, policy, prior premiums, available experience modifications, claims count, paid and reserved losses. Include actual loss runs or another history accepted by the underwriter.
- **General questions.** Complete the 24 questions and all relevant Yes explanations, including height of work, subcontractors, safety, travel, employees and prior insurance problems.

Do not guess: experience modification, class codes or carrier premium. A new quote may not yet have a current estimated premium; disclose when prior mod information or loss runs are outstanding. Minnesota/Utah zero-exposure attestations do not apply to this fictional Colorado risk.

ACORD 131 | Umbrella / excess liability

Complete and confirm

- **Requested program.** Umbrella versus excess, occurrence versus claims-made basis, requested each-occurrence/aggregate limits, retention/attachment and coverage basis.
- **Underlying coverage.** For GL, Auto and Employers Liability when underlying: actual insurer, policy number, effective/expiration dates, limits and available prior premiums. Verify with declarations rather than assuming the umbrella follows form.
- **Underlying terms.** Defense-cost treatment, excluded operations, special endorsements, claims-made history (if applicable), hired/non-owned auto treatment and limitations.
- **Exposures.** Complete applicable liability/exposure questions about vehicles, subcontracting, pollution, products, aircraft, watercraft, foreign work and other relevant operations.
- **Claim history.** Answer the form's specific five-year question about liability claims over $10,000 and circumstances likely to produce claims. A small WC loss does not automatically answer the umbrella liability-loss question.

Check the vehicle details: the narrative mentioning two service vans should agree with any requested count/radius entries. Confirm the underlying Auto coverage using ACORD 137 or actual declarations.

ACORD 140 | Commercial property

Complete and confirm for each insured building

- **Identify the risk.** Premises number, building number, full street address, building use and ownership or lease arrangement.
- **Insured property and limits.** Building, business personal property, stock and other applicable subjects; requested values, replacement-cost or other valuation, cause of loss, coinsurance terms and deductible.
- **Construction (C).** Construction type, year built, stories, basements, square footage, roof type and roof age; dates/extent of electrical, plumbing, heating and roof updates.
- **Occupancy (O).** Actual operations inside the building, other occupancies, vacancy or leased portions, combustible or hazardous storage and special property hazards.
- **Protection (P).** Hydrant and fire-station distance, protection class where known, sprinklers/percentage, central-station or local fire/burglar alarms, servicing company and safeguards.
- **Exposure (E).** Right, left, front and rear neighboring risks and distances; open sides and other relevant surrounding hazards.
- **Additional coverages/interests.** Business income/extra expense details and ACORD 810 when requested; other property endorsements; mortgagee/loss payee and loan information when applicable.

Page 2 is additional premises: complete it only because this example shows a second warehouse. That warehouse must also appear on ACORD 125 with consistent location and building numbers. For one building, an unused second-premises page is not itself a deficiency.

Yes/No questions on the ACORD forms and supplements

- **Y/N is not an answer.** It marks a question that needs the insured's or knowledgeable producer's response where applicable.
- **A Yes requires the requested detail.** Include dates, quantities, locations, loss amounts, payroll, percentages, or explanations and attachments whenever the question asks for them.
- **A No must be deliberate.** Silence in the declarations, schedules or loss runs is not enough to answer No.
- **Some questions are conditional.** Claims-made questions on an occurrence policy, other-state attestations, unused premises rows and boiler follow-ups without a boiler should not be forced into a Yes or No.
- **Supplements are part of the submission.** Answer applicable insurer, class-of-business and state supplemental questions to the same standard as the ACORD forms.

Items to resolve in the six fictional examples before sending to underwriting

These are actual discrepancies or unverified items shown in the supplied samples. They are not corrected by making an assumption.

- **Locations.** ACORD 140 includes a second warehouse at 200 Training Way, but 125 does not list it. ACORD 130 lists 100 Example Blvd while 125/140 list 100 Training Way: confirm mailing address versus true work/risk locations.
- **Work at heights.** ACORD 125 describes no work over 15 feet; ACORD 130 describes 16–25-foot work. Confirm the actual operation and answer consistently.
- **Ownership.** The 125 sample indicates an LLC with two members while 130 lists one owner with 100% ownership. Confirm the ownership information and treatment on WC.
- **Business history and website.** The 125 start date of April 2015 conflicts with 130 stating nine years in business as of October 2026; the website descriptions also differ. Confirm both.
- **Auto questionnaire.** The prior 127 sample has a No recruiting-method answer with a Yes explanation; telematics details are populated without a response. The review version intentionally asks Y/N again.
- **Coverage coordination.** Confirm whether WC is intended as one of the requested lines on 125; verify the actual state Auto form/limits and that umbrella GL, Auto and EL underlying details match expiring declarations.
- **Exposure classifications and loss support.** GL and WC classifications are illustrative, and actual loss runs, current mod information and COPE/safeguard evidence were not provided.
- **Premiums and umbrella terms.** Some displayed premiums are sample estimates, not insurer quotes; confirm any actual prior premium separately. Umbrella defense/attachment details and exclusions require review.

Commercial submission review before marketing the risk

- □ Correct legal insured, ownership, business description, contacts and addresses confirmed.
- □ Every operating location, building, vehicle, driver, payroll class and GL hazard exposure accounted for.
- □ Requested coverage, limits, deductibles and applicable state/line supplements included.
- □ Prior carriers and loss history accurate, with available loss runs and expiring information attached or outstanding items disclosed.
- □ All applicable Y/N questions answered; Yes explanations and relevant attachments supplied.
- □ Facts that appear in more than one application are consistent.
- □ Known missing or unverified facts are listed plainly for the receiving underwriter.
- □ Authorization, signatures, dates and initials obtained when the insurer or submission stage requires them.

What is not automatically needed for an initial indication: a future carrier quote, new policy number, assigned underwriter, unused extra schedule rows or signatures not yet required by the receiving market.

Scope and confidence: *This is a commercial insurance completion guide grounded in the six supplied ACORD editions and the fictional values shown. It is not a universal list of mandatory carrier fields. A receiving carrier may require additional schedules, supplements, inspection details, loss history or signatures. The sample applications must not be represented as actual insured statements.*
