

Feedback: Testing 125, 126, 127, 131, and 186. Please review the previously shared ACORD 125 mapping.

1. When someone is clicking into a package from the dashboard, they should land on the package profile - even if they have started their forms. I think I would prefer this instead of clicking from dashboard to go directly into the next step. Maybe we could allow the dashboard option to “View Package Profile” or “Continue Where You Left Off”. Or something like that. Your call on whichever is easier.

Any forms that they have already started can go into their own tab and/or perhaps directly underneath the “Key Details” section.

2. I like the way everything looks at a glance, but I have a problem with the highlighted. Systemically, we should not be requiring the forms to be created in order to get the score. Reminder that we need to move towards a formless environment with forms optional so that we can layer SQS on top of any existing 3rd party system. Perhaps that's a V2 thing, but it's incredibly important to keep in mind.

What are our immediate options here? Pre-score? Hide or change? I like how it looks, but I don't want to portray messaging that we are heavily forms dependent.

3. Remove the “Important” section and button above it. It’s too confusing having repeated items.

A screenshot of a form section titled "Important" in red. Below the title is a sub-header "The warnings to look at first. Their actions are in the groups below." followed by two bullet points. The first bullet point is "ACORD 125 minimum field missing: Proposed effective date" with a fix instruction "Fix: Provide this value manually, or upload a document that states it.) (+1 related)". The second bullet point is "Driver schedule not provided - list the drivers of the scheduled vehicles (name, licence, date of birth)" with a fix instruction "Fix: Review and correct this before proceeding."

4. This is supposed to be the last date of the renewal, which is found in the dec sheet.

A screenshot of a form section titled "Missing baseline ACORD 125 fields" in red. Below the title is a bullet point "ACORD 125 minimum field missing: Proposed effective date" with a fix instruction "Fix: Provide this value manually, or upload a document that states it." At the bottom of the section are three buttons: "Open to fix >" (red), "Resolve" (grey), and "Dismiss" (grey).

5. We’ve already discussed contacts. They’re in the dec.

A screenshot of a form section titled "ACORD 125 minimum field missing: Contact information" in red. Below the title is a fix instruction "Fix: Provide this value manually, or upload a document that states it." At the bottom of the section are three buttons: "Open to fix >" (red), "Resolve" (grey), and "Dismiss" (grey).

6. Error when clicking to fix.

A screenshot of an error dialog box titled "UPDATE THE SCHEDULE" in red. The dialog contains the text "Driver schedule not provided - list the drivers of the scheduled vehicles (name, licence, date of birth) Fix: Review and correct this before proceeding." and "This schedule is not available for the current forms." At the bottom right are two buttons: "Cancel" (grey) and "Apply" (red).

7. 125 - Why isn’t ANY of this carrier information auto-filled? It was at one point. Producer phone and email are in the dec.

19. SQS Review from Download (i.e. “Open Recommendations”) - This Form, the SQS recommendations are very useful, but they appear way too late in the workflow. These should be on the initial submission score, and/or while reviewing the forms. They should not be an afterthought right before downloading.

-
- I'd like each item to tell me what needs attention, what to do next, and how it could affect the score. It should also be clear whether information is missing, the AI withheld a value, or an inferred value needs verification. Can the score update as I resolve items?
- Is this possible with the current workflow? If not, what's the simplest way to give users this guidance before they go to download the forms?
- the Field QA summary says 4 required fields are empty and 7 AI-inferred fields need verification, but I can't tell which forms or questions it's referring to.

General Comments:

- For the client email can it say "Commercial Insurance Submission Platform" not just "Commercial Insurance Platform"

- If there is a landlord then the client will need to provide how the landlord wants to be listed as - full name and address for certificates
